To whom it may concern:

Working closely with Art Hirsch of TerraLogic Sustainable Solutions on the CDOT Transportation Erosion Control Supervisor (TECS) Certification, I have come to respect his work etiquette and project management skills on this project.

I have grown to depend and rely on Mr. Hirsch in many ways while working on the TECS project, notably maintaining of quality deliveries, refined organizational skills, meeting tight deadlines, meticulous attention to details and the management of team members. Mr. Hirsch met critical and at times demanding deadlines, while keeping the quality of the product above standard and remain on target as to content and subject matter. Mr. Hirsch's ability to manage and divide this large undertaking into tasks with scheduled deliverables; insured the process to be on base, on schedule and within budget. While working under such a tight schedule, Mr. Hirsch has always remained professional even under intense pressure and has persevered with an excellent product.

Mr. Hirsch is able to budget accordingly to the demands of the project insuring the tasks are on time, within budget and of exceptional quality. During the review process, Mr. Hirsch was able to add details were needed, manage these changes then distribute to fellow team members insuring uniformity.

I hope to work with Art Hirsch of TerraLogic Sustainable Solutions frequently in the future.

Sincerely,

Tripp Minges
MS4 Construction Lead
MS4 Public Education Lead
TECS Project Lead
